TURBOMACHINERY INLET SILENCERS

ADVANTAGES

- Maintains a low and stable pressure drop
- Designed to your specific requirements

 Dampens noise from turbomachinery

Application	Turbomachinery Systems such as gas turbines, large industrial air compressors, diesel & gas engines, generators
Installation Options	Our casing designs are either internally lined or externally cladded. Baffles can be splitter type in SST, galvanized or aluminum or modular ''brick'' type in SST. We also offer tube silencers.
